More specifically, the present invention relates to a flip-flop circuit and a delay circuit including the same, with which even a large quantity of data can be transferred at high speed. In recent years, a system in which many transmission gates are connected in cascade to accomplish parallel transmission has been proposed. This system generally adopts 2-transistor CMOS logic or BICMOS logic as the circuit. Therefore, it is difficult to employ the gate of a CM 1cb139a0ed
