What's New In AutoCAD?

Compare markups: Use the Compare command to compare your draft to the design you were based on or to a locked drawing that has the same changes you've made. (video: 1:15 min.) Ensure that drawings aren't broken or incomplete: We've made it easier to review changes made to your drawing. You can lock your drawing to prevent further changes. (video: 1:11 min.) Incorporate 3D models: Use 3D objects, like doors, windows, or furniture, to add additional information to your drawings. AutoCAD's 3D commands can be used to insert 3D objects into the drawing, import your 3D object into a 2D drawing, or convert 2D into 3D. (video: 1:09 min.) Share your CAD drawings on the go: If you're trying to share your drawings on a mobile device, you can use the Mobile app to attach your 2D or 3D CAD files to an email, send them as a text file, or send them as an image. You can also annotate your drawings by drawing directly on an image. (video: 2:44 min.) Incorporate drawing comments into models: View comments on your drawing that will be automatically imported into the model. (video: 1:16 min.) Get help from text in your drawings: Read and follow instructions in AutoCAD's Help system. You can also search the web and find help for specific topics. (video: 1:15 min.) Follow the cloud: If you're working on a project that has shared data with other members of your team, you can use the cloud to work collaboratively and share updates with colleagues around the world. (video: 1:16 min.) Import point clouds and local model data: Use Point Cloud and Local Model tools to convert your CAD data into a 3D geometry. You can use Point Cloud to import multiple CAD files into a single 3D geometry or Local Model to import a single CAD file. (video: 2:09 min.)
