Google has many special features to help you find exactly what you're looking for. What's a website? A website is a computer file that contains information and is made up of pages or webpages that are connected to each other. How do I find or create a website? There are many ways to find a website. For example, you can: 1. Ask someone on the phone to help you find a website. 2. Search for a website address on the Internet. 3. Look for a website or "URL" (Uniform Resource Locator) on a computer screen. 4. Find a website in a book or a magazine. 5. Find a website by visiting a bookstore or library. Here are some tips on how to find a website: 1. Search for a website on the World Wide Web, also known as the Internet. 2. Search for a website on the World Wide Web using a web browser like Firefox or Internet Explorer. 3. Go to Yahoo! or MSN.com and search for a website or a web address. 4. Use the address that the website provider gives you. 5. Type in the web address into a web browser. 6. Go to a bookstore and ask for a directory of websites. How can I make a website? 1. Choose a web page design template. 2. Decide what information you want on the site. 3. Decide who you will share your site with. 4. Write the text for your site. 5. Choose a font type and size that you like. 6. Create a customized background image. 7. After you finish creating your website, add hyperlinks or other content items that you want visitors to access. Note: You can upload your own pictures to enhance your website. When do I have to pay for creating a website? 1. Some websites are free to create. 2. You may have to pay someone else to create a website 82138339de
