The problem is that it is much longer than we need. Since it needs to be plugged into a wall outlet, I though that I could simply cut the cord to an appropriate length to work around this issue. My question is: If this was not the case, is it possible to use a convenient but less safe extension cord that can be unplugged and connected to a male plug without leaving a mess on my floor? Alternatively, is this an unacceptable practice, and if so, why? A: I did some searching on this topic; you are not the first person to discover that shorter cords can be connected to a male plug and that you can "reuse" the cord, in effect, by making the "reusable" cord a regular extension 3da54e8ca3
