Thoughts on Open Source and the Sublime editor? - morenoh149 Good evening everyone,I recently developed a rather large community site. I'm looking for feedback on my approach and the product itself in general.It's in alpha stage and pretty rough around the edges.I have an iMac running OS X 10.6.6 and a Parallels/Prelude virtual machine.HTML/CSS is the main content/theme. Other tools include GIT with Mercurial, PHP, MySQL, and python. The site is backed by Ubuntu running Amazon EC2. ===== jobeirne I've used Sublime Text for two things: (1) hacking on Python (2) developing JQuery plugins. It's pretty much a perfect combo. (1) I used to work on the Racket REPL in Sublime, which is one of the best parts of the editor for me, and still does. However, you could hack a Python REPL in it just as easily. (2) I use JS tools really good in Sublime. Paste snippets are good, personally, for writing small bits of JS without having to edit, reload, refresh. My biggest concern about Sublime is that it's barely getting any traction. Compare the number of votes on the Sublime Text Google group to the number of posts on the official wiki and the number of commits to the Sublime Text repository. 3e33713323
