What's New In?

As the name suggests, this is the edition of Weltweitimnetz Browser you can directly save on an USB flash drive to use on other computers as well. Apart from mobility, other consequences mean the computer you use it on remains clean, because there aren't any registry dependencies. Visually appealing and easy to use As the name suggests, this is the edition of Weltweitimnetz Browser you can directly save on an USB flash drive to use on other computers as well. Apart from mobility, other consequences mean the computer you use it on remains clean, because there aren't any registry dependencies. Running it brings up a pretty polished main window, with custom-made elements that give it a little personality, but don't go far from a regular browser layout. This lets you accommodate in a jiffy, and start accessing a few web pages to see how well it performs. Decent features at the cost of stability Bookmarks can be saved on a dedicated toolbar, with some popular locations already pinned. There's even the possibility to import from other browsers, which comes in handy, given you can use it on the go. There's also a history tracker to easily revisit closed pages in case you don't remember how to access them again. Navigation is easily put in motion, with the address field found in the upper toolbar, along with navigation buttons. In addition, there's a search field to quickly look up items of interest, but it can't be set to other engines, the default one being Google. However, the application could do with a bit more work on stability. With only a few opened tabs, it stops responding for a while, and if you're in a hurry to make it work, things can even turn into a crash. Speed is decent, but recent web technologies are not well implemented, which can have an impact on the way content is displayed. On an ending note Taking everything into consideration, we can say that Portable Weltweitimnetz Browser Come with good intentions, and a decent set of features common for most popular web browsers. Visual design is neat and lets you quickly accommodate. Unfortunately, stability isn't the strongest point, which has a considerable impact on overall practicality. What do you think about this item?
