----- The days of physical disks may be nearing their end, but that doesn't mean that CDs or DVDs are any less stylish than they were back then. It's quite often that you'd come across some interesting CD covert art, especially when it came to music albums and movies. It's most likely that the art was made by professionals, who in turn handled some professional software. Developers come out with all sorts of programs nowadays, which is all the more convenient for everyone. RonyaSoft CD DVD Label Maker is exactly what you would expect: create cover art for your discs, either by starting from scratch or using one of the many provided templates. An old-school editor The program looks like a blast from the past
