file name mean when trying to open a file? How to open this file "foo.txt"?

A: Trying to open a file with no extension is equivalent to trying to open a file with the name foo.txt (note the period). The actual file name is only used when using a full path to the file. So, for instance,./foo.txt is a valid path to a file, but foo.txt is not, even though foo.txt is a valid path to a file.

A: The file foo.txt does not exist. In this case, what you really mean is that you want to open a file with the name foo.txt. The period is used to denote that you want to open a file of any kind (directory, text file, etc) and the

extension is used to denote the file type, in this case, a text file. The Slender Man is one of the most popular and oft-featured spooky characters on the internet, the source of countless memes and even a short film. Now, thanks to a new Kickstarter campaign, fans can officially add Slender Man to their Halloween decorations. The full-size, eight-foot tall Slender Man statue is poised to be the biggest item of Halloween decor in the house. The new campaign, called The Slender Man, centers on a full-scale replica of the Slender Man character, complete with his face,

body, and hands. The campaign is headed by artist Jason McIntosh and illustrator Dylan Cuthbert, who also worked on a 2013 Kickstarter campaign for the Slender Man action figure. The campaign officially launched this morning and will last through October 7. The Slender Man comes with his signature tentacles that, according to the campaign
