Intra-abdominal desmoplastic small cell tumor. Small cell tumors of the abdominal viscera are not common, but can be difficult to differentiate from other small cell tumors (small cell carcinoma and lymphoma) or other sarcomas (desmoid and leiomyosarcoma). This report discusses a case of intra-abdominal desmoplastic small cell tumor (DSCT), its treatment and presentation. A 49-year-old man presented with complaints of malaise, weight loss, and bowel obstruction. During an exploratory laparotomy for small bowel obstruction, a 12 cm solid and 10 cm cystic tumor involving the mesentery of the small bowel was found. Postoperatively, tumor was sampled and metastatic disease was ruled out. Histologic examination showed features of desmoplastic small cell tumor (DSCT). Immunohistochemical studies showed CD56 and vimentin positive cells. The patient then received 4 cycles of chemotherapy consisting of etoposide/ifosfamide/cisplatin, but died of respiratory failure. This report serves to emphasize the importance of recognition of this tumor as an important differential diagnosis of intra-abdominal neoplasms. Evaluation and conclusion Unsurprisingly, the program left a small footprint on system resources in our tests, using a low quantity of CPU and RAM. It didn't hang, crash or pop up error messages. It failed to run on Windows 7 in our tests, but we must also keep in mind that it hasn't been updated for a long time and likely has compatibility issues with later Windows editions. Otherwise, vDrive is fast and efficient when it comes to mounting folders as virtual drives for seamless access.
