## WebsiteSpider Crack+

SiteSpy is a powerful web spider that allows you to get the most out of your time. It automates the crawling process of websites and gets all the content from the websites you are interested in, thus saving your time and effort. 1. Start crawling websites SiteSpy enables you to start a web crawling with just a click. You can either manually type in the URLs of the websites or load in your own website collection in the form of a CSV file. The most important thing to know about the application is that it allows you to crawl multiple websites at a time. 2. Get realtime web traffic analytics If you already know which websites you want to analyze, then you can simply add the website names to the list and SiteSpy will start the crawling process in no time. Once the crawling is finished, SiteSpy will start generating real-time traffic reports based on the collected data. You can also save the results to a CSV file. 3. Get all the details about the analyzed websites Crawling websites and getting the detailed information is one of the most important functions of SiteSpy. You can look at the site pages on which the crawler has visited, view the URL, get all the data about the domain, find out which files are hosted on a certain server, find out how many people visited a certain page or view the keywords used on a certain page. SiteSpy provides a plethora of valuable data and it is all displayed in a user-friendly manner. A speed crawler that saves you lots of time SiteSpy is a fast website crawler that can crawl thousands of websites at once. You can therefore save lots of time and energy by simply using SiteSpy to generate real-time traffic reports for your websites. No need to look for websites manually or fill out forms to get the collected data. 4. Get information about the website's age, server, hosting, meta tags, H tags or requests with a HTTP status code errors By using SiteSpy, you can get detailed information about the websites. You can see the age of the domain, domain's age in months and in days, domain's age in years, domain's name, domain's description, domain's type, server location, the number of visitors for the last 30 days, the number of visitors for the last 30 days and the website's popularity. You can check out the top

## What's New In WebsiteSpider?

WebsiteSpider is a light-weight, yet powerful tool that provides you with information about web pages in a convenient and easy-to-read format. WebsiteSpider is a web spider that crawls your favorite web pages and scans them for the information that you are interested in. WebsiteSpider can help you to gather crucial information such as the website's domain name, URL, website host, server, hosting, meta tags and HTTP codes. It can save these reports in PDF, GIF, JPEG, BMP and TIFF files so you can browse them later. You can also generate these reports as separate PDF, GIF, JPEG, BMP and TIFF files. WebsiteSpider can generate up to 1000 URL report on a single page. WebsiteSpider scans URLs via cookies, HTML Headers, JavaScript and the HTTP\_REFERER headers. WebsiteSpider can analyze and sort web pages based on the information that it gathers. WebsiteSpider can search and collect information about website keywords, logo, links, image, and meta tags. WebsiteSpider can also search for relevant links and images in websites. WebsiteSpider can crawl a website for up to 1000 pages. WebsiteSpider can analyze all the results that it gathers and present them in several convenient reports. WebsiteSpider can read pages in Google, Bing, Yandex, Ask.com and AOL. WebsiteSpider can save URLs in a CSV file, comma-separated or in a standard format (XML, RSS, ATOM, HTML or plain text). WebsiteSpider can sort URLs according to keywords, meta tags, referring pages, search engines, domains and dates. WebsiteSpider can be started by simply pasting a URL in the dedicated field and choosing whether to save the results in a specified directory. WebsiteSpider can also be started by using the predefined commands to select a specific type of information you want to collect. WebsiteSpider can also be started by clicking the command button on the right side of the interface. WebsiteSpider can generate up to 1000 URL reports on a single page. WebsiteSpider can analyze all the results that it gathers and present them in several convenient reports. WebsiteSpider can save URLs in a CSV file, comma-separated or in a standard format (XML, RSS, ATOM, HTML or plain text). WebsiteSpider can read pages in Google, Bing, Yandex, Ask.com and AOL. WebsiteSpider can save URLs in a CSV file, comma-separated or in a standard format (XML, RSS, ATOM, HTML or plain text). WebsiteSpider can generate up to 1000 URL reports on a single page. WebsiteSpider can analyze all the results that it gathers and present them in several convenient reports.
