Ativador Vray 3.6 Sketchupl

Category: . A: This is an error not from the loader but from the Google Play app itself. This has nothing to do with your application and the error message cannot

be reproduced and does not make sense.

You can report a bug to Google Play from here [Q: Find timezone offset from](#)

current time of a specified timezone

Possible Duplicate: [How do I find the Time Zone / Offset from Date in PHP?](#)

How do I find timezone offset from current time of a specified timezone? I need to find the timezone of a user with timezone android. When I get the current time in specified timezone it gives me a time and then I need to find offset in timezone of my location. Thanks A:

DateTime takes a DateTimeZone parameter, which is set when you instantiate the object. You can supply the

TimeZone::getDefault() to get the default one, which will be used if you do not. The offset will then be use with offsetHours to produce the time difference. Q: How to set

NSUserDefaults to init only? I want to set some default values to my app user defaults but only want them to be initialized at the first run of the app. Is there a way of doing this? Current code to add default values to user defaults

```
NSUserDefaults *defaults =  
[NSUserDefaults standardUserDefaults];  
NSInteger first = [[NSUserDefaults  
standardUserDefaults]  
integerForKey:@"firstNumber"];
```

```
NSInteger second = [[NSUserDefaults
    standardUserDefaults]
    integerForKey:@"secondNumber"];
NSInteger third = [[NSUserDefaults
    standardUserDefaults]
    integerForKey:@"thirdNumber"];
NSInteger fourth = [[NSUserDefaults
    standardUserDefaults]
    integerForKey:@"fourthNumber"];
defaults.setInteger:first
    forKey:@"firstNumber"];
defaults.setInteger:second
    forKey:@"secondNumber"];
defaults.setInteger:third
    forKey:@"thirdNumber"];
defaults.setInteger:fourth
```

forKey:@"fourthNumber"]; A
