Atlantis Data Space Analyser

Atlantis Data Space Analyser is an easy-to-use application that will display various charts and help you find out why your SQL server consumes the data space that it does. Data Space Analyser makes the task of capacity planning and research a much quicker and enjoyable task. It produces graphical representations of object storage requirements, all the way from each database as a whole to each individual table, index and even partition. You will quickly spot any inconsistencies in the space used by objects and be able to find information on exactly which objects are using what space, intuitively and naturally through an interactive chart. Is there an equivalent of the following: select TOP 10 * from SomeTable order by someColumn This shows the 10 most recent entries. A: I think you are looking for something like this: SELECT TOP 10 * FROM [Your_Table] ORDER BY [Some_Column] DESC The ORDER BY is optional, but makes sense if the output is going to be sorted or filtered in some way. A: If you want a more relaxed version of the simple top-10, consider the following: SELECT TOP (10) * FROM [Your_Table] WHERE [Some_Column] = 'your value' ORDER BY [Some_Column] DESC Q: Failed to deserialize data As you can see my REST call is right there. Error {System.FormatException: An error occurred while deserializing the object of type 'NuBuild.Models.TMSData'
