Photoshop and other apps are also available individually for \$699.99, \$59.99 for students, and \$199.99 for individuals. Photoshop is available as an open source, not a completely free software, though you can get most of the features for free by using the Free Software Foundation's package. This usually includes the ability to make three free images per month from your personal computer. Most people find this an unsatisfying amount of processing. The software is also available on nearly every major operating system under the GNU Public License. History Photoshop was created by Paul Marlow, Gary Roesler, and Thomas Roesler at the San Jose, California-based company Adobe Systems. The Photoshop technology was developed as a real-time bitmap editor. The program is based on an Object-Oriented programming paradigm and uses the Picture window and Edit window techniques. Photoshop was originally released in May of 1987, making it one of the oldest commercially available graphics programs. It was developed by a small team of Adobe programmers while the company was located in Palo Alto, California. Originally called Softimage X5, Photoshop was the second major release of that product line. The initial release of Photoshop was only available in English, but the program's popularity created a demand for more localized versions. Production also necessitated the use of Macintosh software and that demanded the use of Mac technology in the company's development. It was the first software application to be offered in this way. The first version of Photoshop to appear to the public was version 2.0. The initial version was an experimental release with features that could be purchased separately. In early 1989 Adobe made a first of two significant design changes to the software. First, the new Photoshop was radically different from the previous version. It was both more structured and more powerful. It was also much easier to use. The second significant change was the introduction of the Mac windowing system. The second major update to the software, version 3.0, appeared in May of 1990. It was the first version to be offered as both an installable Mac application and a disk version. This version also included the new layer system. This is now the main structure used to build images for Photoshop. The most recent revision

Selecting Multiple Images The Select tool is one of the most versatile tools in Photoshop. You can use it to select multiple files, adjust the selection using the Selection Brush, and apply filters or other adjustments to the selected areas. You can also use the Selection Brush to make a selection around an object. The Selection Brush tool will tell you what it is doing by changing from a brush pattern to a selection circle icon. You can use the Dodge tool to remove a color or adjust the lightness of an image's colors. The Burn tool darkens an image by removing the highlights and lightening the shadows, making for a dramatic effect. You can also use the Eraser tool to add back details that are missing from an image, such as small pieces of wood or other objects. When you use the Crop tool, you can use it to resize and crop an image so that it will fit on a page, shrink an image by eliminating extra space, and crop a single area of an image out of an image. You can also use the Quick Selection tool to highlight areas of an image, which you can then modify with the Selection Brush, Dodge, Burn, or Eraser tools. After you have selected an image, you can make it easier to work with it by using the Quick Selection tool to select part of the image. You can then apply filters, effects, or other adjustments to the selected areas of the image. You can also select multiple areas of an image, then copy, paste, or move the image using the Move tool. You can drag an image around a worksurface, move it on the canvas or in the image, or flip it horizontally or vertically. You can also select a rectangular selection using a selection marquee and move the image by dragging the marquee.

Drawing and Editing Lines You can use the Line tool to draw lines on an image. You can use the Pen tool to draw a straight line and the Pencil tool to draw a freeform line. You can use the Ellipse tool to draw circles and polygons. You can also use the Rectangle tool to draw freeform rectangles. You can even draw three-dimensional lines. The Pen tool is a powerful tool, especially when it comes to adding details to artwork. You can use the Brush tool to paint with color or the Airbrush tool to paint using a mixture of color and line. Story highlights Biden urged to walk away from presidency if he loses Biden refused to endorse his son, Hunter, in 2015 In the CNN Democratic debate Sunday night, he defended his son and work as vice president in Ukraine Bernie Sanders calls for Biden to suspend his campaign; Clinton says Joe Biden has earned the nomination Joe Biden is not going down without a fight, but it would be better for the country if he were to step aside, an adviser to Hillary Clinton says. "If Joe Biden loses (in the primaries), he should just walk away," the adviser told CNN's "State of the Union." "We'll have (Donald) Trump and (Hillary) Clinton." Clinton campaign chairman John Podesta said Monday in an interview on CNN that "we think he should walk away" if he doesn't win. "If he loses the nomination, he needs to step aside," Podesta said. The comments from Podesta come just a day after Biden offered a non-endorsement of his two children after they were subpoenaed by a federal grand jury investigating their business dealings in Ukraine. Biden said that his son, Hunter, should not have taken a position with the energy company Burisma, a Ukrainian gas company, and he shouldn't have accepted a sweetheart deal from the company's owner. Hunter Biden's business arrangements have drawn criticism from Trump during the Democratic primaries. The Trump campaign called for Ukraine's prosecutor general to look into the matter Sunday. "There's a whole world of people who are calling on Ukraine and other countries to investigate, and yes, other people who are running," the adviser said. "He doesn't need to vote for them. He can say, 'I'm not supporting them.'" The Clinton adviser also defended the timing of Biden's decision not to endorse his son. They said his son made a mistake, but the vice president did not break the law by doing what he did. The adviser suggested the public criticism of Biden is "disingenuous" because the U.S. attorney general's review of the IRS handling of conservative groups' applications for tax-exempt status will turn up an "epidemic" of political corruption in the tax agency. "If they want to make it about something else, they should," the adviser said. Sanders' call to suspend the campaign came in an email statement to CNN. "As we head into the convention this
