Here is another example What have I tried Tried multiple scripts that I have found on other posts. But nothing is working. I have tried a few other suggestions that have been posted in the past, like adding the header or header_file. I have tried adding and removing the search from the script. A: It looks like you're missing an indentation on the second line: header_file = open('movies.txt', 'a')

header_file.write(str(i)+"|") Sequences of the 5'-upstream region of the cyclosporin A-specific transporter (CsA-P-gp) gene of CsA-resistant MDCK-P-gp cells. We have isolated and characterized the 5'-upstream region of the CsA-specific transport gene (CsA-P-gp) of the kidney-derived MDCK-P-gp cell line (CsA-R) selected by the resistance against CsA. Southern blot analysis revealed that in the 5'-upstream region of CsA-P-gp there was a deletion of 2.5 kb which was located at the position -1776 to -916 from the translation start site in CsA-P-gp mRNA. Sequence analysis of the deleted region in the CsA-P-gp cells revealed two copies of related sequences, which were similar to the sequences 5'-upstream of rat multidrug resistance gene and the human multidrug resistance gene. In addition, by means of a transient expression experiment using deletion mutants of the upstream region of CsA-P-gp gene, we found that the sequence proximal to the 5'-flanking region of CsA-P-gp gene was necessary for the efficient transcription of CsA-P-gp gene, that is, four sequences, such as ATAAATG (at nucleotide position -1406), CTTTAT (at nucleotide position -1394), CAGCAG (at nucleotide position -1381) and AGGTTA (at nucleotide position -1383), were necessary for the core promoter activity. Although some other sequences were also necessary for the promoter activity, most of these were located in the distal region.
