Audio Redirect Description: Sound Redirect is an audio recorder and playback tool that allows you to capture audio output from your sound card, assign different input and output settings, and set which sound card is your default sound output. With the ability to capture from line-in, mic-in, application, and media device, this can be an ideal recording device.-specific phosphorylation and desphosphorylation of myosin light chain, which probably activates myosin ATPase activity, causing muscle contraction (Berdyas et al., [B5]; Bradley et al., [B7]; Gabbiani et al., [B13]; Luscher et al., [B24]; Kawahara et al., [B20]; Terkel et al., [B35]; Blewitt et al., [B6]; Lamba and Boldin, [B21]). Our current data also showed that AAV2/2-IUMPS improved the muscle strength in response to AAV2/2-myogenin-induced myotube formation. Together, these data demonstrate that AAV2/2-myogenin and AAV2/2-IUMPS synergistically activate signaling pathways to promote muscle differentiation. In addition to a modulation of gene expression profiles, our data also
