Category:Windows games Category:Windows-only gamesIf you see a new icon on your desktop, you might think that an app has been added — until you realize that it's actually your GNOME shell extension. That's been my experience.

Yesterday I was about to make a friend's "High Sierra" birthday announcement when I saw this icon: Wow, something interesting is happening. Curious, I opened the menu to see what the icon referred to. And here's the result: A window that asks you to add a new calendar! I know that people dislike the new icons and wondered how a simple search could show that they've been installed.

According to this post, the official installers still use the old icon. Is a change that big in the OS? So, how did this happen and what is it? I did a quick search and saw that the GNOME developers have added the "Calendar-Applet" to the extension directory: I even tried to roll back to the original version. Well, there's

something wrong. Since I couldn't find any information about this, I asked the
