Send texts to all your contacts, a group of your friends or your entire address book by using one of the SMS sending features in one simple to use, clean and flexible interface. Its main and most interesting feature is its ability to send texts to an unlimited number of mobile phones simultaneously. Save time and save money by sending SMS through your PC, without being tied to a specific network or mobile operator. Features: Send SMS to all

your friends or any selected group of friends, or to all your contacts. Send SMS to a single mobile phone or to a group of mobile phones. Send texts from any application using the SendToMobie function. Use the mobile phone text function to send SMS, MMS and multimedia content (MMS) with a single keystroke. Works with mobile phone contacts from Microsoft Excel, Windows Explorer and Windows Address Book. Send SMS to mobile phones from a standard PC keyboard or from a virtual keyboard. Generate

SMS by copying or typing text from a web browser. Send SMS to the Outbox for review and processing. Encode and decode messages to allow you to use SMS on other phone models and on a wide range of OS and MTAs. Check if the phone number is valid. Check the validity of the phone number and of the carrier information. Manage the SMS settings for a particular SMS message. Manage the SMS settings for a single group or a list of groups. View and manage all SMS messages, including a list of the sent

SMS messages. Send a message to multiple recipients by using the To field. Search for SMS messages by number, name or the SMS text content. The SMS has a language setting. Select the language of the messages, so you can send SMS in the language you prefer. Supported Phones: All Windows Mobile phones, including Windows Mobile 5.0 and later. MOBI BULK SMS Crack + Activation Code With Keygen

A utility that allows you to
apply text patterns to regular
expressions, so you can create
your own macros. The

procedure is quite simple: you select the text pattern you want, click the Enter button, and the program substitutes the selected text with the text from a predefined macro. You may set up all the macros for your favorite text string, and then use them in regular expression patterns. If you're tired of repeating the same text over and over again, you may create your own macros and use them in many different regular expressions. KeyMACRO offers you a large number of predefined text patterns. You may choose

among different text characters, patterns and colors. Additionally, you may record your own macros. You can edit the macros with a text editor, and if you are a programmer, you may create your own macros and share them with others.

KeyMACRO is a simple but quite powerful tool for generating macros. The program allows you to preview the results of the changes before applying them.

description: An excellent utility to help you record multiple keyboard shortcuts in just one go. It's a handy tool for beginners who often forget to press the “Record Macro” button in their regular keyboard shortcuts. Keymacro lets you specify any kind of key shortcuts, such as mouse, keyboard, and control keys. You can record your own hotkeys or choose from a library of different hotkeys you may want to assign to your keyboard, as well as create your own hotkeys for any activity. You can use

Keymacro in any text editor, and it won't open when it detects you are writing an HTML document. You can record any number of hotkeys, and you may choose the order in which the hotkeys should be processed in. The same hotkeys will be processed in the same order when you activate the macro. Keymacro lets you apply keyboard shortcuts to any activity or file. It also supports different kinds of controls. You may combine hotkeys with control codes (CTRL and SHIFT), and if a hotkey is assigned to

the CTRL key, you don't have to hold it down to perform the hotkey. Keymacro is a neat utility that allows you to simplify the process of creating keyboard shortcuts. Keymacro description: A perfect utility to 1d6a3396d6

MOBI BULK SMS is a small Windows application designed specifically for helping you send SMS to multiple phone numbers at the same time using straightforward features. Simple looks and connection options The program doesn't excel in the visual department as it adopts a plain design. Although it doesn't offer support for a help manual, its features are highly intuitive so you can get used to working with them in no time. Sent messages, phonebook and

other handy features The utility lets you check out a list with sent items, show all sent messages or perform searches by a specific phone number, view details about the sent messages, such as mobile phone, message, date, time and status, clear all sent items from the list, as well as generate a report with the sent items. What's more, you can store your contacts with the aid of a phonebook. You may add multiple groups to the phonebook and define a new group by providing the name. A new contact can be saved to

a group by entering details about the ID number, phone number and name. You can write a personalized text message right in the main window or paste the information from another document and send messages to the Outbox. SMS can be sent to a selected group or all of them. Last but not least, you can set up a master password so unauthorized users cannot gain access to your private information. Bottom line All in all, MOBI BULK SMS comes with a basic pack of features for

helping you send SMS to different phone numbers simultaneously, and is suitable especially for rookies. On the downside, it hasn't been updated for a while so you may encounter several incompatibility errors on newer operating systems.
