Only a preview shows the download link to be have any downloads. I've been trying for a few days now and it keeps telling me no items are there. I think there may be a bug with KDP or something. I want to know if anyone else is having these problems and has a solution. I am new to KDP so I don't know much about it. I am wondering if I need a new version. Thanks! A: Yes, I am experiencing the same issue. It would appear that your attempt to make your library public has been blocked. I can't find anything on their website or anywhere else that explains why, if you have any luck. Q: PHP Session variables not carrying over to new page I have been having a lot of difficulty changing how my php sessions are storing/retrieving data. Currently when you go through the login process, at the end of it, you are brought to "dashboard.php", in which you can see some of the information you entered into your form. I want it to be that if you go to the "dashboard.php" page and log in again, that all the information you entered into the form would be stored in the session. I have tried with the code below, but when going to the next page, the variables that were f30f4ceada
