3D Platformer / game design studio in studio belgrade. In game dev studio we are developing 3D platformer with the newest technologies. We create games with bigger themes like love, death, philosophy, ideology, art and other more. You can experience this in our game King of Congo, where you have to represent one of three goals in the fight against the evil empire. The game is about a king, whose actions will determine the future of his land. The game is inspired by many games of the last decade, like Kingdom Rush, Diablo and Breath of the Wild. In the near future you can play this game for free on our own servers - but starting this spring you are able to play and see the game in a game court. There are differences between the game court and the "real" servers. On the game court you don't have to download any game client. You can be away from your computer all day and always be online. If you want to play on the game court, check out the links below. Official website: Facebook: Hi!
