The functionality to import and export drawing information is available through the OpenDraw.dll, which is located in the AutoCAD install directory. AutoCAD Architecture In 1998, AutoCAD Architecture was developed by Leed Architecture, a Toronto-based architecture firm, to add architectural support to AutoCAD – a first in the industry. It enabled architects to utilize AutoCAD to design and produce architectural drawings and prepare 3D models. AutoCAD Architecture was the first architecture-specific solution for AutoCAD, and the first product developed for AutoCAD by a third-party architecture firm. In the late 1990s, AutoCAD had started to gain traction in the architecture community, largely as a result of rapid growth in the construction industry. In response to this increase in interest in architectural applications, and following a period of research and development, Leed Architecture was launched in May 1997. The firm's first product was AutoCAD Architecture. Architecture is a domain-specific discipline, and AutoCAD Architecture was developed to take full advantage of the functionality available within the AutoCAD software. AutoCAD Architecture enables architects to create professional 3D models from AutoCAD drawings, as well as to view these 3D models and view perspective views on a 2D plotter. As well as supporting the design and production of 2D plans and elevations, AutoCAD Architecture provides a full, professional solution for the design and production of 3D models of building interiors and façades. AutoCAD Architecture was an early solution for AutoCAD, and the first architectural-specific solution developed by a third-party architecture firm. In response to this increase in interest in architectural applications, and following a period of research and development, Leed Architecture was launched in May 1997. The firm's first product was AutoCAD Architecture. AutoCAD Architecture's functionality was based on the Leed Architectural Framework (LAF), which provides a coherent design structure for architectural models and solutions. The LAF is based on AutoCAD Architecture's object-oriented architecture. It is designed to support an object-oriented design process, and has

been developed in a manner consistent with AutoCAD Architecture's architecture. The LAF includes five primary functional components: AutoCAD Architecture Base, AutoCAD ca3bfb1094

This puts the case back on the Court's calendar, but without the significant delay that a remand back to the D.C. Circuit might have entailed. Arguments were scheduled for Wednesday, December 14, 2010 at 9:30 a.m. Before the case is argued, the Court will hear from the Government's lawyers and the Librarian of Congress. The Justices also may address questions to counsel during the arguments. The D.C. Circuit issued its ruling this week holding that in-state public universities cannot charge students out-of-state tuition. In its order, the Court did not dismiss the appeal, but instead remanded the case back to the trial court for further consideration in light of the intervening S2096 case in the Supreme Court. Below is a link to the full text of the appellate court's ruling in *Armstrong v. Exceptional Student Programs Inc.* Next week, the D.C. Circuit Court of Appeals will hear arguments on whether in-state public universities can charge students out-of-
