Zombies Must Die is a small base game of Runnyk, in which you will need to choose between 4 characters. You are playing a small part of Runnyk's journey. You can choose to be a viking, a tamer, a fighter or a wizard. Once you are sure with your character, you will have to face powerful creatures and powerful weapons. When you get the chance, run away from them and do your best to protect yourself. You'll find useful items on the way, so don't forget to collect them! If you want to save Runnyk's beloved you'll have to fight the Ancient creatures who guarded the four magical runes. Do your best to survive. To be continued... * Runnyk is not affiliated or endorsed by the Walt Disney Company. Featuring a hot new game from Matt Makes Games, FruitFall is a physics-based puzzle game in the vein of Bejeweled, Braid, and Tetris. Each level comes with 12 fruit items to collect! You'll start the game as a seed, and through the course of ten increasingly difficult worlds, you'll grow from a humble plant into a mighty tree. There are over 40 different types of fruit in FruitFall! Collect all of them to gain their special powers: - Sprout: Grants you a new seed. - Fruit: Lowers the fruit count for all fruits on the board. - Multiplier: Lowers the fruit count for all fruits on the board by one. - Blocker: Clears all fruits from the board. - Fruit Bomb: Shoots fruit all around you. - Fruit Chaser: Increases the fruit count for all fruits on the board by one. But be careful! The more fruit you collect, the more powerful your enemies become. FruitFall has you start as a tiny seed, but if you're careful and keep gathering fruits, you'll move through 10 colorful worlds: - Forest: The first level of the game. - Vegetable: A challenge, with plants being your main opponent. - Fruit: More planets await you with fruits, but you can't grow any more. - Gold: Addictive levels, with bling! - Flurry: They're back, but this time, your fellow plant friends are deadly. - Flight: Fly through a planet filled with flaming fruit! - Sprout: An

Chivalry: Medieval Warfare Features Key:

- A fun and dynamic reaction based score system: You and your opponents can fiddle with the modifiers of casting void spells such as **Fireball** and **Fire Storm**. This boosts enemy defenses and increases the damage to your enemies and not to you.
- Each spell class has its own distinct **damage formula**. This includes damage bonuses for using certain supporting spells, anecdotal. Even within the same spell, there is a wide variation, even within a single character.
- In addition to those spells, characters are given access to a broad and versatile set of **abilities**, including **Improved Damage Reduction**, **Greater Healing Touch**, **Improved Movement**, and the **Void Ability**, which greatly boosts your entire cast of spells. This is a game of *amplification* – take a low damage-per-attack with a nice rate of healing and high movement speed, and you turn it into a lethal weapon, with plenty of damage and fast enough movement to teleport over creatures.
- Player classes come with their own character specific abilities. A wizard takes **Greater Portals**, a bard gains **Improved Bardic Performance**, while even classes as small as the Rogue class gain **Improved Movement** as a second class ability.
- Spellcasting is turned on in 3 different ways. The first one is that the casting of any spell can be dismissed, either as a one-time discount, an action or a free or semi-free action. The second way is that the **Void Energy** is a resource and that the player is always replenishing it. The third way is that specific spells require a **Void Charge**; this is not directly usable nor can you manually recharge it, but playing as a better wizard will increase your movement

Inc. Organic Waffles Share this Recipe Organic Waffles

With their low-carb, gluten-free, and whole grain credentials, organic and regular waffles are basically the same food - minus additives or coloring. But if you like to whip up a lower-fat breakfast, these easy-to-make waffles are a healthier option compared to regular. They're light and fluffy with a warm fruity sweetness, and they're topped with wholesome blueberries and fresh yogurt. Add some coconut milk instead of regular milk if you want to make them extra creamy. Fluffy and Light Sprouted and ground flax are crucial to the structure of organic waffles. When flax is soaked in water, its long chains of carbon molecules stretch out and open, allowing water molecules to bind to the ends of those chains, making them a lot more elastic than ordinary wheat flour. That's what it takes to make fluffy waffles! "Whole" means that the ingredients are "whole": They contain the whole grain. The benefit is twofold: The fiber in whole grains can lower cholesterol levels, and whole grains contain lots of important nutrients. Whole wheat flour for waffles is lower in carbs than ordinary white flour, and it also contains magnesium that helps maintain healthy blood pressure. Whole grain flours are generally more nutritious than refined, and organic-approved brands are no exception. Organic corn grits and organic rice grits, for instance, have almost all the same nutrients as corn and rice flour, but they're more nutritious because they haven't been milled into tiny flour particles. For a whole grain flour that's more, um, compact, you can use whole wheat pastry flour instead. The Whole Grain Story The more you read about the health risks of refined grains, the more likely you are to be eating whole grains in your waffles. Whole grains are a great way to stay full throughout the day, and they're loaded with nutrients. Whole grain oats are high in protein, fiber, vitamins, and minerals. Brown rice often comes in bagged packs, and it's a great source of fiber, vitamins, and minerals. And yes, whole wheat pastry flour

may look a little less healthy than white flour, but it's still better for you, and it contains more fiber and less fat. A Note
