## **Features Key:**

Turn-based online Battles against an internet opponent by connecting the devices of two players.  
Play turns in a different environment without waiting for information on whether the opponent  
played.

Create the worlds of a city and Battle System that is both fun and exciting.

One-on-One Online Battles against the AI of a Pawn. Engage in multi-person online battles or catch  
up with the progress of one of your Opponents.

Intuitive Character Creation System. You can recreate your character in the same state of  
appearance as that of a character that was created in-game.

Expand your own world and face your opponents with a variety of new items.

Battle of the Behemoths : In addition to quests for renown, traveling through the world with a friend  
like or dislike and training your companions are all possible.

The world will be rebuilt in a new place in 2015.

AdvertisementQ: How to check if string contains spaces anywhere? I am trying to convert a string to lowercase (I'm programming in Swift, so no if-let or if-else-if), but I keep getting nil (or "") for the result if the string contains spaces anywhere. let myString = "How can I eliminate the spaces in this string??" if let result = myString.lowercaseString { print(result) } The result is "". A: Regular expression was the answer. func checkStringContainsSpaces(str : String) -> Bool{ var bool = false let pattern = "[\\s]+" if let regex = try? NSRegularExpression(pattern: pattern)
