Tip By choosing the Resize drop-down menu from the Image Size dialog box, you can also choose from several different presets: * **Fit:** Makes the image fit the selected frame. * **Lock Aspect Ratio:** Maintains the selected frame's aspect ratio. * **Stretch to Fit:** Scales the image until it completely fills the selected frame. The other options include * **From the Right Side:** Crops the image from the right-hand side, all the way to the left. * **From the Bottom:** Crops the image from the bottom of the frame. * **From the Top:** Crops the image from the top of the frame. * **From the Left Side:** Crops the image from the left-hand side. * **From the Center:** Crops the image from the center. * **Rotate Clockwise:** Rotates the image 90 degrees. * **Rotate Counterclockwise:** Rotates the image 180 degrees. * **Snap to Grid:** Organizes the image so that any objects you draw are aligned to gridlines that you define. You can even crop the image so that specific objects are taken out of the image. The Crop tool is almost always found at the top of the toolbox. It usually doesn't have an exact alignment, but rather just a selection box to crop from. You can use the Selection tools (Move, Rectangular, Elliptical, and Lens Correction) to crop an image, but, most often, that involves using the Crop tool first and then working from there.
