Discover a world where all who wish to survive have to prove themselves by proving their skills in combat. While most races simply compete to survive, the Skyratz species are different. They're tested on the battlefield by their fellow citizens to survive, and are chosen to be the ones to defend their people... at all costs. Avion City's current history The Skyratz species first began to appear on Earth about 60 years ago. Since then, their civilization has gone from primitive to technologically advanced. A single industrial city has now become the center of the Skyratz universe, with a plethora of top-notch inventions and modern technologies. Avion City is a vibrant world, with various races inhabiting the various different districts of this city. Over 100 districts populate Avion City, and the Skyratz people have taken to the skies as one of their means to travel the massive city. Meet the new Avion City Although Avion City was built over 60 years ago, the layout is much the same as when the Skyratz first settled. The lower districts have undergone improvement and modernization to become more appealing to the city's residents. The upper districts are the true heart of the Skyratz. Many of the machines and buildings introduced more than 60 years ago still operate today, allowing the sky-dwellers to live in harmony with their inventions. Avion City's ecosystem Avion City, like any other city, hosts many different races. Some of these races have integrated with Avion City and adopted it as their own, while others reside in the "alien" districts. However, some of these races are still infected with xenophobia and refuse to work with other races. As a result, many races despise the other races and feel threatened by them. Avion City is a bustling place, with citizens from all races and races are seen mixing and working together. But, as always, life is never easy for the Skyratz. Do you have what it takes to be the best Skyratz? A: You can play this game on the Mac and a PC through Steam. You can play for free as a trial. HARDCORE MECHA focuses on robot collecting. Players have to collect the parts of robot and assemble them in order to take off and fly. By collecting parts, upgrading the mecha, and developing skills the time for preparing for combat will be shortened. As a result, players can unlock new parts such as gears, armor, weapons to construct new mecha. In terms of animation and design, HARDCORE MECHA successfully captured the charm of robot anime. Fans of the genre will absolutely enjoy it. 9/10 e-gamers

Score: HARDCORE MECHA is an entertaining and thought-provoking fusion of action and strategy. With a great number of components, lots of strategies, fast-paced battles and strong characters, HARDCORE MECHA delivers on what it promises. Fans of robots and mecha should definitely try it. 6/7 CGAMER

I felt that flying and flying are well-made in the game. Unlike some other RPGs which abandon your own mecha with a few rounds, playing as the mecha is an amazing pleasure. With great moves and skills which are developed in battle, I also like the fact that there are also some special moves to fight with strong attacks to trigger instant death. 9.5/10 CGAMER

I don't know what "Dive into the enemy" mean but i can say it's the best and unique feature of this game. You can fly around enemies and attack them from afar. It makes me never miss a chance to kill that weak enemy behind the wall. 26/30 e-gamers

What's new:

- I sent a Gugnith to the Divinity Faire, Ostara 2018. I wanted to enter the terra cristula, but I had a bag, and it was an hour until the gate closed. If I wanted to catch the next departure I had to do it fast. But there was a soul orb without catching it would not help us in our mission, right? There were several witches already entered the terra cristula, but one or two should be going to Kelvarnad soon. I put my bag down, visited some shops and took a little break, then set off. At first, I was a bit worried, then I started to find it more amusing. I was in the middle of no-mans land, with technically not direction toward anything. Just to relax, I stopped and scanned the area and searched for the Orb. I found it in a surprise and a few minutes later the gate opened. The sky darkened, the air grew chill and the witch slipped through the gate, I did not even know that gate closed. Was a damp aura like an extra, to clear the way. Nothing for a moment all was silent, then came a low murmur, a hum of the Vanität and at the same time a sensation of proximity, She came nearer, in the clearing a voice could be heard, A voice which said hello. The voice was pleasant and seemed to have recognition, but I did not wish to talk to anyone yet and I did not dare to grab. I am in the terra cristula, I thought, not am I in Hell. Furthermore, Vane had disappeared. The purpulant voice was soothing, but familiar, as if I have been here before, however, the pearly white aura, is not familiar at all, whatever did it? I heard the voice clearly, turn out it was an old, because the voice was surprised to see me. The aura was friendly, but fierce, and wanted me to draw close to the clearing and talk. The voice now was talking in the background, it sounded as if all heard the voice who wants to talk to them. I carefully entered the clearing and felt an aura of

gentleness around me, someone checked my clothes, it also sounded as if someone drank some water, I watched with interest after this interesting behavior, and finally came another aura, this time of wisps of light, which wanted to do the same. Suddenly, a woman wanted to
