Wilco TBM-850. 26. 20 Dec 2011. Project SOCATA TBM 850 FSX. you a good hack?Q: @EJB Injection In Test Class I am trying to inject an EJB (which I implemented with JBoss Modules) into a test class. I have a very simple controller in which I try to inject the EJB.

Controller: @Controller public class
InjectionController { @EJB private ServiceEJB serviceEJB; public String getEJB() { return serviceEJB.getEjbMessage(); } } When I try to inject the EJB into the test class I get the following exception d0c515b9f4

Category: Aviation media Category: Video game engine programming tools Category: Video game development softwareQ: Troubles with a code to get the time between two results First of all I want to say that I'm french, so please don't be too hard on me if something is a bit off from the norm. I have a code that should check what's the time difference between two results and it works fine (see below). However it doesn't output the correct answer. Could someone help me out? I'm unsure where the problem is. Thank you! Edit: I have edited the code to be quite self-explaining. import datetime print("What is the difference between these two dates?") date1 = str(input("First date: ")) date2 = str(input("Second date: ")) yyyymmdd1 = date1.split("-")[0] + "-" +date1.split("-")[1] yyyymmdd2 =

```
date2.split("-")[0] + "-" + date2.split("-")[1]
                   diff =
  datetime.datetime.strptime(yyyymmdd1,
              "%Y-%m-%d") -
  datetime.datetime.strptime(yyyymmdd2,
"%Y-%m-%d") print ("Difference between %s
                 and %s" %
     (datetime.datetime.strptime(date1,
               "%Y-%m-%d"),
     datetime.datetime.strptime(date2,
"%Y-%m-%d"))) print ("Difference in minutes:
 %s" % diff.minute) A: Just did a quick test:
  from datetime import datetime date1 =
 "2019-10-21" date2 = "2019-10-22" diff =
  datetime.strptime(date1, "%Y-%m-%d") -
  datetime.strptime(date2, "%Y-%m-%d")
diff.minute "60" The present invention relates
 to a marking process for printing a narrow
 design such as a bar code on a transparent
 substrate, such as a paper board, and more
                particularly
