1. Field of the Invention

The present invention relates to an image sensor, and more particularly, to a CMOS image sensor with a pixel array structure and a shutter control method.

2. Description of the Related Art

Currently, CMOS image sensors have been widely used as image sensors in digital still cameras, camcorders, or the like. In addition, CMOS image sensors have been used not only in digital still cameras, but in a wide variety of applications, including security systems, automobile image sensors, and robots. A CMOS image sensor generally includes a plurality of pixels, each of which includes a photodiode, and a plurality of switching elements for switching the output of the photodiode. The switching elements consist of MOS transistors or thin film transistors (TFTs). Among them, a three-transistor CMOS image sensor includes three TFTs, a photodiode, a floating diffusion node, and a reset transistor. An example of the three-transistor CMOS image sensor is shown in FIG. 1.

FIG. 1 is a schematic circuit diagram of a three-transistor CMOS image sensor. A three-transistor CMOS image sensor 100 includes a first switching transistor M1, a second switching transistor M2, a photodiode D, a floating diffusion node FD, and a reset transistor R1. The first switching transistor M1 includes a gate connected to a first line SL, a source connected to a power supply VDD, and a drain connected to the floating diffusion node FD and an output terminal OUT. The second switching transistor M2 includes a gate connected to the first line SL and a source connected to the power supply VDD. The photodiode D includes a p-type semiconductor region. The floating diffusion node FD is connected to a gate of the reset transistor R1. The reset transistor R1 includes a source connected to the floating diffusion node FD, a gate connected to a second line SL and

It was filmed on location in San Antonio, Texas, in the United States. The film is the fifth installment in the Elmarion pseudo-series, and the second to feature a major change in film production. Plot In the 19th century Jules Dortrea (Brent Briscoe), a "thrill seeker" who is always in the thick of a perilous, and sometimes deadly, adventure, is driven to dig into the ruins of an ancient Aztec temple for artefacts. Jules and his sidekick, Tex Moreno, sleep rough in a nearby cave one night. Tex falls asleep, and wakes to find himself on the back of a large reptile, a dinosaur like creature. The other creatures wake, surprising Tex, and one slashes him open with the claws on his right hand. Jules saves him, offering to take him to a hospital, but Tex relocates the wound from his only usable hand to Jules' good arm, saving him. Both men return to the cave and tumble off to sleep. When morning comes, Jules is filled with guilt at leaving Tex, and they head to see a doctor who can sew up Tex's wound. The doctor refuses, so Jules attempts to give him money to take Tex to a local hospital. The doctor is disgusted with Jules' attempts, but they remain patient. Tex awakes and asks where they are, to which he is told in Spanish, and is then told he has been swimming in the ocean, through the confusion both figures believe a Mexican sea serpent. Tex learns that Jules has been repeatedly meeting a woman, Rosa (Keri Russell), at the site of the abandoned ruins. Jules gets angry with Tex, then with himself, and decides to leave. He fills Tex in on the situation. Later that evening, Tex goes to the local saloon to ask Jules to return. However, Tex is met with rejection, and wins a game of poker, earning the attention of the local sheriff (Kevin Sorbo) and his sidekick, Mouse (Bruce Campbell), wherein Tex tells them of Jules.
