Play Video "Skaara!" shouted Agni as he pulled a cylinder-shaped cannon out of his top pocket and turned around. R.D.VIX was only a few feet away. He pulled the trigger, blasting a jet of fire out from his right hand. It blew R.D.VIX in two. He picked up the halves and grinned. "Game over, buddy!" I have always wanted to do a parody mod like that, only with actual weapons from the game. I guess I will start with this one. 1) Add "Skaara" as a mission in the Stripes map.The challenge is a fairly simple one. You are being chased by a number of enemies, including Gunther. You have to go through a doorway which will have been booby trapped by the enemies. You cannot drop your weapons to open the door (you can only do it with an F key or if you disable weapon drop). You have to use the booby traps to blow yourself up in order to open the door (you can only do it with an F key or if you disable weapon drop). Inside the doorway is a secret weapon that you need to take out, (I know, i already say that the whole challenge is fairly simple, but it's still something), and once you have the weapon, you can turn off weapon drop. So you have to go through the doorway, take out the weapon, wait for it to lock on you and drop it, and then run away and the door opens. Afterwards, you complete the mission and unlock the weapon. This is because Agni had more than one weapon in his inventory, but he could only equip one at a time. 2) Do the same for "I just need a drink" in the Cops and Robbers map.Again, this is an easy challenge. Your objective is to locate a liquor store, find a seller inside, buy enough money to buy enough booze to recover health and then run off before the policemen appear. (Beware though, you can only take so much time, you need to pick your battles.) This is made a bit harder by the fact that the seller is lurking in the midst of 10-20 enemies which he can blow away to get you (along with the bouncers who are guarding the place). However, you can distract him by tossing him a drink and making him run off (it

Review Monday, February 15, 2014 SOUND FORGE Audio Studio 14 Steam Edition Audio studio applications have been available for years, but the sound libraries available have typically been very small, limited and usually expensive. When SONAR was released, it was one of the first really good choices for the industry, at an affordable price with a huge and growing set of tools and plugins that could be used. However, something as straightforward and objective as a recording mix can suddenly become a lot more complicated when you need to deal with multitrack editing, multiple microphones, multiple instruments, potentially as many as four or five different mix buses and possibly some form of pre-processing on the audio before the actual recording. SUMMARY If you are looking for a fully-featured surround-sound recording mixer and environment, SOUND FORGE Audio Studio 14 Steam Edition is certainly worth a shot. While it lacks some of the features found in SONAR 8, its speed, depth and usability makes it not only more powerful than most sound studio programs, but at an even lower price point. That means that, if you can live without some of the advanced features, this program can meet your needs for quite a while. It is safe to say that SOUND FORGE Audio Studio 14 is the most feature rich, powerful pro audio recording and production tool in this price class. The ability to record up to 64 channels of audio makes it a perfect choice for projects with dozens of instruments and channels of mixing and perhaps even be just a general run of the mill stereo recording setup. Where SOUND FORGE Audio Studio 14 could potentially struggle is if you are trying to record 5.1 surround audio, which is something that SONAR can provide. SOUND FORGE Audio Studio 14 has the power to provide a quite a number of surround tracks, but the quality suffers to a certain extent. However, you can get up to 8 tracks of 5.1 surround and more; it just won't be quite as good as the SONAR 8 if that is what you are after. If you are looking for a full SONAR replacement, SOUND FORGE Audio Studio 14 is certainly a really hard choice to make. While most would probably agree that SOUND FORGE Audio Studio 14 is the most powerful true 4-channel recording and mixing tool you can buy, with an even richer set of plugins, the question becomes, will you be willing to pay the

A New Battlefield Without Borders No borders, no territories. As the first in its kind, Magical Battle Festa, offers players the chance to step into a world where they can truly play without any fear of "being arrested for being Japanese." The ability to play without boundaries has been recreated for the newest title from the global mobile juggernaut Chillingo and brings new features and upgrades to the field of mobile gaming. Its proprietary presentation engine allows for a more dynamic experience that automatically adjusts to a wide range of iPhone and iPod touch devices, from the smallest Retina-enabled iPhone 4 up to the most advanced iPod touch 4th gen. The storyline continues as players battle it out in a new account-based battlefield system. Take control of a customizable character and take on players from around the world in order to rise in the ranks and become the best. In many ways, this is akin to the idea of being in a virtual RPG where the player becomes a fighter and takes part in the big-time battles in a world set in a unique setting unlike any other game out there. Due to the account-based battle system, players are not pitted against a single opponent, but rather, against a multitude of opponents. And each character can be levelled up and customized to increase the odds of victory. Players can customize their fighter by purchasing gems, which are used for a host of things ranging from weapon and armor upgrades to special attacks. As a result, you'll have to decide how much customization you want to exercise, and it's very likely your first option will be to invest in gems. Don't worry—you'll also have a chance to spend gems on special moves, buffs, new weapons, and even special arena layouts. We expect that many players will take the path that we have taken in this game, and will focus on customization, which is obvious and one of the game's most distinguishing features. Immersive Campaign What is a mobile game without a campaign? Magical Battle Festa takes advantage of the technology seen in the Nintendo 3DS eShop by allowing players to partake in a full-fledged epic story-driven campaign, complete with various different environments, multiple missions, and even special bosses to fight. The campaign features a variety of characters for players to take on and battle, and a true story-line that is easy to understand. In this sense, the campaign has a high level of polish, as each mission felt like
