In an age of empire's and corruption, the people are raised up against the power of the Shogunate. With the only remaining power for the people comes the civil wars and conflicts known as "The Revolution". The Shogunate has set their eyes on the resistance and sees it for what it is: rebels and a thorn in their side. They send a man to do their bidding and strengthen the Shogunate army and all that's left of the civil war resistance is to fill their ranks with the disenfranchised. The Shogunate sends out Captain Usado to take control of the revolting areas. Led by the rules of the Shogunate, as in any other lands, the inhabitants are forced to work for the sake of the war effort, in order to prepare for the upcoming campaign. Set in another era, where samurai's are a thing of the past, the government forces use mechanized units and heavy weaponry, while the insurgents recruit young men from the more rural areas, for their guerrilla warfare. The early battles are fought in the ruins of the war's past, as the insurgents attempt to hold back the Shogunate's advance. But as the ranks of the insurgents grow, and the balance of power is tipped in their favour, they take to the mountains to regroup and raise a new army. Playing as the insurgents, you must join the resistance to build your forces and stand up against an enemy who has not lost sight of his goal of conquest. The project Blink began in 2017 as a team of enthusiastic individuals who wanted to make a fun and original board game in line with the Kickstarter community. We were curious to what existing products would be like as a crossover of the board game and RPG genres. We started to think, "How would it be if we make a game where people were able to rebuild the universe?" In that process of thinking, we realized that several points to consider would be as follows: (1) It seems to be a board game, but it's not a board game itself. (2) It's a hexagonal board game, but it's not a board game as well. (3) You have to link together various kinds of different resources, and make an interesting planet. (4) You have a limited time. (5) You have to randomly roll the base. (6) You're starting from scratch with an empty block to make things interesting. (7) There are a lot of technologies to consider and unexpected things can occur. (8) There is a great deal of freedom to make a planet. So there are many reasons to become a pioneer of the universe with the latest project. With some different and entertaining game mechanisms, Blink is already attracting attention. Our goal is to provide an exclusive game experience to all mobile gamers. So please enjoy the game. Download it and share with your friends! Please contact us with your ideas and suggestions.
