Visit website: username in MTS forum is "FireCorn": The 1984 classic: A simple yet fun game that draws you into another place and time. You are Huey, Dewey and Louie, and you are in the Secret Agent headquarters. The poor employee who has just now entered must now flee from the wicked "Security Guard" over there. (You can jump over him.) The least that can happen here is that your briefcase is knocked off the desk and is rolling towards one of the five aisles. This must be avoided, as it contains the dangerous atomic bomb. If you do not avoid it, the same fate can befall you, as it can only be defused by the bomb squad. So, you must use the skill you have learned well since childhood: jumping! The controls are very easy to use. You will have to tap the screen to jump. There are five levels, with increasingly difficult obstacles and a cat trying to grab you in the last level. Also, there are not many checkpoints. So, you can be sure that you will have to keep practicing for a while. Luckily for you, your instincts have prepared you for this kind of things, and you know that the shortcut is to the right side of you. If you do not get this, you will end up on the same place as your buddy, so it will be a one-way trip... You must avoid jumping into the aisles, as if you touch one of the walls, you will be hurled into another lane and get lost and eventually die. The obstacles are a hand, a wall, a bin that falls into the chute, a moving hand, a bin that falls into the chute, a moving hand, a falling roll of paper, a moving hand, a bin that falls into the chute. Each of these will cost you 1 life. Play now! Sonic Runners is an endless runner with friends. A great Sonic that runs forward, jumps over obstacles, and runs up walls. By David Walters Sierra Burgess Is a Loser The Kidnapping of Edwina Mountbatten HILIGHT: This is a fun and rockin' independent movie with lots of political, ecological, queer, and anti-authoritarian ideas. It stars Alex Nikoleas, Sxip Louw, and Eric Avery. The Gunman An adaptation of Ian Rankin's “What's left to find in your half-built cottage after you’ve murdered your wife with a shotgun in front of the local parish priest?”(Wiki) In Praise of Small Screen Planning an “original musical fantasy adventure” based on the writing of a Welsh author.(Eston River Films/Black Arrow) In the Acme Presents: Christmas Concert at the Acme In Concert City of Suffering A dark comedy about the pastor of the Church of the Pancreatotomy and his attempts to cure his depression after his wife dies. “Faith does not exist if it is not tested against the blade of hard truth” -Leo Strauss. Hugely inspiring, maybe more inspirational than poetry. Sperm Whales Sperm whales drive themselves single-handedly to the ocean depths, their livers are their only source of oxygen and nutrients, and there are no other creatures to mate with them. Developed by Ghost Machine Studios, in association with North American Productions, our primary goal is for this title to become the world’s best VR racing game experience. We are prepared to ship the game with an additional Development Kit for those that want to create VR Content for the title. Development Team: Todd Jackson, CTO Jason Whitney, COO Adam Vainio, Director of Technology Adam Lee, Director of Graphics Pat Towe, Director of Programming Our Team: Chris Stern, Product Manager, formerly Lead Product Developer Carlos Checa, Designer Daazong Liu, QA Danielle Thomas, 3D Artist David Anson, Lead Tech David Horan, Lead Tech David Harding, Lead Tech Dillan Lee, Tech Lead Eric Harpst, Tech Lead Jared Gallman, Tech Lead Kevin Xue, Software Engineer Logan Suhl, Front End Patrick Tracy, Design, Tech Lead Tom Tuite, Front End Tom Vasik, Mechanical Design Wayne To, Graphics Yong Hwang, Lead Engineer A: That's a very well developed game, that could run on a large range of devices (from low-power to high-power) and platforms (from smartphones to PC). However, the game seems focused on being a dedicated VR experience which means it's a "single player" game (no user account or multiplayer). It's one of the most realistic racing games available. Some of the features of this game are realistic physics: the car and the track are taken into account and behave as they would in real life. realistic damage: the car suffers damage after collisions (on the driver and on other cars) and thus needs to repair itself. well developed AI: the AI reacts to changes and is very challenging very well developed graphics: the car physics and tracks are rendered with the high-end physics shader resulting in very realistic rendering very well developed gameplay: players can learn the track and the cars while playing (optionally), a dedicated AI will help you during game play (if the player allows the AI) I would highly recommend this game. It's available to buy in several different ways: I'm having a problem with my game. What should I do? Steam directly
