Do you think it would work for downloading a pre-installed version of VMware to the microsoft windows OS? Also, what could be a reason for this error message? Thanks, J. A: The error message means that you have four scratched DVDs or CD-ROMs in your drive. Because you have that many media in there, the drive cannot load the required drivers. It has nothing to do with your computer or the software you are trying to install. Make sure you have all 4 CDs in the DVD drive and test the install one more time. A: Are you trying to install either VMWare Workstation or VMware Player? Or are you trying to install another type of software? In either case, you will need to download and install all four drives to do so. Unless you have a backup, I suggest getting to a computer with a CD drive, and burning the ISO file to a disk. Use the "unshielded" or "blank" version (no disc it in or nothing) and use the ISO file to burn a new disk. [The role

On Google I found a solution: why it's not working, how to do that? `session_write_close()`; `session_destroy()`; `header("Location: index.php");` But I've just reinstalled my xampp and I've installed WAMP on my computer so I tried to destroy the WAMP's configuration too and it doesn't work. I've just tried, but still not working. I tried to connect to my site with the user and the password of my account but in the MySQL query I use everytime my database password and I wasn't able to connect through my site. If someone could help me I'm trying to fix this for 3 months.. I've already asked someone on the xampp forum but haven't got any response... A: I just tested this and it works fine for me. You should be able to put the javascript after your PHP code, making sure you put it at the bottom of your.php file. Otherwise, if that doesn't work, try switching `session_write_close()`; `session_destroy()`; to `session_unset()`; The impact of poverty in older urban African-Americans. The purpose of this study was to explore the impact of socioeconomic conditions on the physical health of older black people living in central city neighborhoods in Los Angeles, California. This study is a secondary data analysis of the 1991 National Survey of Family Growth. Elderly African-Americans (50-64 years) in Los Angeles were significantly more likely to report fair or poor health than elderly whites. Poverty was the most significant social characteristic associated with fair or poor health, even after controlling for education and other demographic variables.Q: Using WebStorm to debug PHP, note that WebStorm has no support for PHP? I'm sure I'm missing something, and don't really understand it. I have a website that's mainly PHP, but not entirely (I use JS, and other technologies such as Python, JavaScript, etc). This website is living on a Linux server at work. I have a WebStorm license, and a Linux server with PHP 5.4, Python 2.7 and MySQL. Also, I have root access to the Linux box. So far so good. How do I debug in WebStorm? Do I really need to run it from the Linux server? From my workstation? Can I not just run
