A console and arcade game, made in Adobe After Effects, designed by Bluefade. * WASD or arrow keys controls movement * FEEDBACK when steering, leaning left/right or using the boost/drift boost * Set boost and drifting boost (not just one or the other) * Shortcuts: up/down/left/right toggles boost/drift boost * WIN by drifting for 30 seconds while boosting A: Impossible To Reasonably Explain, The Truth You might want to take a look at an issue in the Requests section of our FAQ, which states: Q: Is this game sexist or was the developer a sexist? A: No! More importantly, the game is not sexist at all. - Tomislav Delija We also have a licensing disclaimer that states: Pixels and Bluefade assume absolutely no liability for any possible damage your hardware may suffer in the game, including, without limitation, your warranty of fitness for a particular purpose. Nor does Pixels and Bluefade assume liability for any damage resulting from possession of the game, whether or not that damage was specifically caused by the game, and regardless of the legal status of your jurisdiction. Another example of our previous disclaimers can be found in our Terms of Use, found in the Legal section, which states: Pixels and Bluefade makes absolutely no claims whatsoever regarding the legality of any online game products and services referred to on this website (or in any affiliated websites or in the hyperlinked websites of third parties) and Pixels and Bluefade shall have no liability with respect to such products and services nor with respect to any damage, loss, injury, or death to persons or property as a result of their use. A: Yes This is classic achievements, but for the wrong reason The game is doing something we're all used to with achievements and achievements games: It's giving us a way to measure progress and achievement. The true sense of achievement in this game comes from completing stages, and there is achievement for every stage that's completed. Some stages are much harder than others, but if you skip through them, you can still get achievements. There is even an achievement for the ability to complete any single round of drift-boosting. Since you do not need the ability to drift-boost to finish a stage, you

Open GalleryQ: PHP: is it possible to use a constant for the value of an IF-statement? I want to use constants to set the value of an IF-statement, but I am having difficulties. My code looks like this: \$filename = 'test.jpg'; if (file_exists(\$filename)) { \$name = 'test'; echo "The name is \$name". PHP_EOL; } else { \$name = 'test.jpg'; echo "The filename is \$name". PHP_EOL; } Now I want to use a constant (or something like that) for the value of the IF-statement, so the final code should look like this: \$filename = 'test.jpg'; define('file_exists', true); if (file_exists) { \$name = 'test'; echo "The name is \$name". PHP_EOL; } else { \$name = 'test.jpg'; echo "The filename is \$name". PHP_EOL; } But this does not work. It is possible to do that? A: First of all, note that you have a syntax error there. Undeafated Skeleton Challenger - A RPG game with an awesome art style with excellent story and a story campaign that will keep you interested for a while. It also has an in-game upgrade system which gives players the ability to add some great additional features to their in game character. With the character leveling up the players will be able to unlock additional features such as bigger weapons, health, fireballs etc. Another important thing is that the game is very customizable, so you can make your character look how you like and how you want him to be, the only limit here is your imagination. With the gameplay system you can level up your characters so the players can gain more experience with each level. There are 3 classes: Tank, Juggernaut, Sorcerer and the Skeleton Class.Tank - They have great defense and no ability to move. You can use the tank class to stand in one place and absorb enemy attacks. The tank's main goal is to keep the enemies from reaching the ranger.Juggernaut - They have a movement speed that gives them the ability to move around the battlefield quickly but they also have a lack of defense. They can use their main attack to devastate the enemies but they lack the ability to hit multiple enemies.Sorcerer - They have a great attack power but they also lack defense and speed. In this class the player will be able to learn new abilities which will allow them to dodge an attack and deal a counter attack in the same round. Also the player can learn to use their power as a decoy and make it so that enemies can focus on the decoy and not them. Playable multiplayer online games for Android. It will give you a chance to win a lot of in-game goods, to buy a tank or a helicopter, as well as you can get a rare weapon.What's new in version 1.1:- You will be able to fight with the friends, that will be a very interesting moment. (Paid content) - We added several achievements for the players. (Paid content) - Fix some issues What's new in version 1.0:- Our game has a second world, that we call the Fun World. This is an old world that players get at the beginning of the game and in it you can find weapons, tanks, helicopters. It will give you a chance to win a lot of in-game goods, to buy a tank or a helicopter, as well as you can get a rare

What's new:

The Shivering Hearts are a criminal organization operating primarily in the city of Amsterdam in 17th century Europe. They are first mentioned by historians in 1625, with most of their criminal activity occurring between 1638 and 1667. They are believed to be based in a city gate community in Amsterdam where their tools, activites and highpriorities are established. They operate in a quite similar fashion with the fellow crime organizations but are not a branch of the larger Orde. The Shivering Hearts were born from the efforts of the infamous firebug, Antonie van der Jaght, when he realized he could not stand the heat of the Amsterdam crucible. Antonie hated Het Steen, Het Ravel, and De Wouw (Northern Barges, Southern Docks, Northern Sailors) and realized that criminal activity would result in a large financial loss if he got arrested by the authorities. To thwart this, Antonie created the Shivering Hearts as his own private criminal faction. Using high stakes robbery as his method, the Shivering Hearts were able to lull the Leiden Regiment, active in the capital, into thinking they had beaten the Amsterdam carnaval and now the other criminal organizations in Amsterdam were more subdued. Particular events have cast long shadows over the Shivering Hearts' history; the members were thought to be involved in the mysterious death of Admiral Kyckman (Boer-Kyckman family) in 1641, and in the assassination of Governor Renard de Neufmarché on April 26, 1642 in his home at the Van der Zypenstraat, the blast shattering much of his home, killing Renard and his wife, and wounding many others. In 1643, it was discovered that the Shivering Hearts had used gunpowder heists to finance the restoration of the Dutch stock exchange, the public lending and borrowing of the very money needed to fight off the Spanish forces and keep the country free. In 1667, under Antonie, the Shivering Hearts sent a force of marauders (a stagecoach robbery) to Breda, again to finance the military effort. Later, during the reign of the Stadtholder William III, a rival clan of Shivering Hearts, the Hakem Street Rangers, began to terrorise the city of Amsterdam. The Hakem Street clan killed a number of members of the Shivering Hearts clan and used the money they acquired from the
