Find Files Pro is a file search and management utility designed specifically for helping you locate your lost files. Search for files The program is designed to perform a file search using the file system and the registry. The engine is versatile and allows for several types of file searches, such as name, size, type, modification date, creation date, location, and title. Apart from the file search, Find Files Pro is capable of searching files by date and by file path. The program allows you to start the file search either by examining the entire file system or by searching a specific location, such as your C drive, D drive, or a network share. The search results list can be displayed either as a simple list, or you can have the program's search results display the file's path, size, type, modification date, and date and time of the last modification. When you want to locate the file you are looking for, you may choose to display the file's details, or you can decide whether to look for a duplicate file that may have been left over on the same drive. Meanwhile, all major data directories are supported, including the Windows C drive, the Windows D drive, the Windows E drive, the Windows F drive, the Windows G drive, and the Windows H drive. You may also filter the results based on the maximum size of the files, the name, and the file type. Some highlights of Find Files Pro include the ability to sort the search results based on

name, size, date, type, and last modification date, the ability to drag and drop the search results to your desktop, the ability to add notes to the results, to sort the results based on file type, the ability to display the results in ascending or descending order, the ability to search for a duplicate file, and to show a list of deleted files. Create, edit, and manage shortcuts Create shortcuts to your favorite programs Find Files Pro allows you to create shortcuts to your favorite files. To create a shortcut, follow these steps: 1. Launch the program and choose the category that you want to manage shortcuts for 2. Create shortcuts to any file that you want 3. Rename the file shortcuts 4. Right-click on the desired shortcut, and choose the "Add shortcut to" option 5. Hit the Finish button and the program will start creating the new shortcuts Create shortcuts to system files Find Files Pro allows you to add shortcuts to system files. aa67ecbc25
