In Dante's Inferno theÂ .Q: Azure Web App - Application Insights - Status Fail - Invalid Server I am trying to setup Application Insights for my Azure App Service. It is up and running correctly, but when I try to view "Monitor > Applications > Web Apps" I get the message: App Running status is unavailable for Azure Web Apps on the server. Invalid Server I have tried the following: Cleared browser and cache Tried clicking on (Rearrange) on top right to open new tab Deleted and reinstalled Application Insights Restart the Web App Delete local storage and try again Make sure SSL works through site None of this work. I have confirmed in the logs that there is no clue as to what is wrong. I have setup a small web site on another Azure App Service to verify that Application Insights is working, and I see no warnings or errors. Does anyone have any ideas? A: Did you upgrade your ARM template to the latest version? The latest version of Azure Web App Application Insights template has the following change: Removed UsageLocation parameter So, by removing this parameter as mentioned in the updated link to our GitHub Azure Web App Application Insights template, please re-add it again and retry. Bilateral parathyroid adenoma causing hypercalcemia. A 76-year-old man presented with a two-year history of hypercalcemia, which was refractory to conventional medical therapy. Based on clinical, biochemical and laboratory findings, a differential diagnosis of renal and bony metastases was considered. Parathyroid adenoma was confirmed by a fine needle aspiration of the thyroid tissue. To the best
