“Technologies like motion capture allow for a level of performance never before seen in a video game,” said EA SPORTS FIFA Lead Producer Fabio W3llmer. “That’s why we’re pushing the limits of what can be done in this category, and giving our players a brand new way to experience video games.” For the first time in FIFA gameplay, a combination of the physics engine and the Artificial Intelligence (AI) engine have been merged for a more realistic and authentic experience. What's more, the AI in FIFA 22 has been improved and has new tools for creating a team that works to achieve the team tactics required to win a game. For players, the AI in FIFA 22 are able to analyze a possession and predict the passing sequence from a player’s point of view. This improved predictive skill allows the

players to perform precise ball touches and make more accurate passes, while also giving the AI a clearer understanding of the game. “The new AI is truly state-of-the-art and is a true step-change in video game AI,” said FIFA Lead AI Designer Rob Brough. “Players can expect AI teammates to be more strategic, to be more aware of their positioning and to understand which tactical scenarios are best to exploit.” The game also features new match-day celebrations and post-game celebrations that reflect the high-pressured, adrenaline-filled environments of a professional game. Highlights include players celebrating goals scored by chorusing into the stands and teammates hugging after scoring a crucial goal. There will also be a range of new challenges, challenges, celebrations and tournaments. FIFA 22 is developed by EA Vancouver and will be published by Electronic Arts in partnership with the FIFA series owners, Electronic Arts. The game releases on Xbox One, PlayStation®4 and Windows PC on September 27th, 2017. What's new in Fifa 22:

- **FIFA 22 unearths decades of Eurocentric football and takes it back to its roots - it's English, Scottish, Northern Irish and Welsh football. FIFA 22 goes all the way back to January 2003 and has just a few months of seasons left to race across the globe.**
- **We've made big improvements to User Interactions from player, manager, fans, to Draft Pick. Now, more than ever before, customised strategies can be battled for as never before. The selection wheel, previously over-used up until this point in FIFA games, has been completely redone for more nuanced decision-making.**
- **FIFA 22 introduces new and improved Player Training, which will allow you to train further in-game and unlock new skill abilities. Practice your shooting, dribbling and passing from the new Pro Stick and Master Trainer.**
- **FIFA 22 includes Xbox One X enhancements including support for 4K resolutions and HDR.**
- **The new edited real matches will bring the pitch to life with goal line technology that shows accurate and playable where you cross the line.**
- **The crowd will become part of the in-game experience as the first of its kind: The supporters can talk to you, even if you are not playing. You'll now be able to see the fans' chants, creating a more immersive in-game atmosphere.**
