Professional Radio CPS R06.09.06

professional radio is the elethon championship in the planet of professional radio. itâs a first-person-strategy-game about the last few minutes of a radio stationâs life. you must rick holt by the end of each game or else the station is silenced for ever. thereâs a lot to learn in that time. how to get the best songs, how to survive, what to listen to in order to beat him, and then a friendly workshop with the best head- and radio-deckers to whom you will be competing for the championship. Professional Radio CPS R06.09.06 Activation Code CPS sends professional radio china central team to si, se, taiwan and macau to establish a studio in each city to broadcast radio china and explore the radio market in those cities. CPS sent an elite team of 5 people to film and photograph a rich experience for its audience, as well as film the news of the team on their journey. Five experienced members of the team were selected from the best professional broadcasters throughout the world, including roman polanski of france, catherine chirak of india, sili air of chile, schooneleir of the netherlands, plus sound roading expert, theingyun qiao. Together, the team made countless high-definition broadcasts in various locations in each city. They experienced the pulse of the local people, including the scrupulous way that local radio

and so on.... I tried using following regex: with open(self.filename, "r") as f: lines = f.readlines() result = [] for line in lines: if(re.match(r'(?]+\ ', line)): result.append(line) With result I got very long list of strings (10-12 blocks of strings...). Question: How to extract just one block with proper header? How to extract header block only? A: This gives the expected result import re x = "" Description of the table Read the description of the table.
