Flowcode Professional 11 is a complete environment for PIC32 microcontrollers which includes a hardware debugger, program development system and code flowchart editor. Professional features include four input ports and four output ports with full data bus support. Developer productivity features include Task Dialog, Push Button and History Panel for automating repetitive tasks. Embedded programming features include embedded programming support. Professional flowchart diagram editor includes a built-in flowchart designer that allows you to construct and graphically display flowcharts. Additionally, a flowchart designer worksheet that allows you to graphically design a flowchart and see the flowchart created in the Flowcode Professional editor. For control functions, it provides a full runtime compatibility program that includes support for various control functions and multiple ports. Flowcode 11 is available now as a standalone application or as a component of the MicrO-Tool Professional offering. This Microsoft Windows version is beta quality. The microcontroller software for this

---

project was written using PIC Basic Pro, which is a special version of PIC Basic that provides enhanced features for the PIC MCU device family, including Link, Data Access, Data Watch, System Timer, PIC Debug, Protected Memory, and Delay-Loop. It also provides access to support tools and project resources, such as linker, link editor, assembler, compiler, and debug tools, and supports flowchart, control, and device programmer models. The software version has been customized to provide additional capabilities that the PIC 9 Series Microcontrollers offer. Flowcode Pro 11 User Manual includes the following chapters: • User's Guide • About the Professional Module • Flowchart Designer • Code Flowchart Editor • Environment • Connecting to the Environment • PIC32 Basic Compatibility (includes System Timer and Link) • PIC32 Hardware Debugger (includes Data Watch,
