The Storyline of The Sims 4: will reveal the story of how the Sims meet and will deal with their personalities through. I can play the game with my friends free of cost without knowing their code.

The Sims 4 Crack.Q: How to modify `http.Get()` to receive HTTP Header I'm trying to modify `http.Get()` function to get specific http headers. I already know that `any-get()` or `http.Get()`. What I would like to do is the following package main

```
import ( "net/http" "fmt" "log" "github.com/go-chi/chi" "golang.org/x/net/html" ) func main() { r := chi.NewRouter() r.Get("/", func(w http.ResponseWriter, _ *http.Request, _ string) { log.Println("GET:", *w) }).Get("/headers", func(w http.ResponseWriter, _ *http.Request, _ string) { log.Println("GET: HEADERS:", *w) }) http.ListenAndServe(":8080", r) }
```

I can see in Chrome Inspector that there are two GETs (thats what I want) that show up. How can I just get the headers and not the body (POST)? Is there something like that in the api? I found this [stackoverflow](#) question where you can pass argument into get which I don't think is what I'm looking for. How can I modify the `http.Get()` so I get just the headers. A: You can simply use the Option struct to do this.

```
r := chi.NewRouter() r.Get("/", func(w http.ResponseWriter, _ *http.Request, _ string) { log.Println("GET:", *w) }) r.Get("/headers", func(w http.ResponseWriter, _ *http.Request, _ string) { log.Println("GET: HEADERS:", *w) })
```
