Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16.

Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Highjacker78; 10/14/2020 Here's a good article about the difference between real education and the education that Roblox is offering today. Roblox's real education does not meet the needs of today's students. Discovery Education; 10/10/2020 The article is misleading, confusing, and the suggestion that the use of Roblox or any other video game is somehow a detrimental use of time is bizarre. Alyson; 9/26/2020 Yes, you need to spend time in school with your peers, but it is worth it. You just can't get all your knowledge from school. You need to use your mind. I think it is great to play games like Roblox as it keeps your brain alert and helps you to understand things quickly. This is why I like playing games like Roblox as an older person or a senior citizen. Discovery Education; 9/26/2020

This is a fully working, working, and working. I have tested and tested over the past five months for sure i can guarantee that it is working great!? ¿ver aquí? ¿Tienes problemas con una maquina de escritorio actualmente? Desea obtener una nueva moneda? Podemos te puede moverte. No se que pasó de hecho, pero al parecer la actualización 17.1 hizo que volviera el problema de los servicios de Robux que había suspendido antes (obviamente, hoy sin servicio). Aunque digamos, que ya lo hacíamos. Esta acción consiste en hacer uso de una manera particular del bloque de robux que aparece en la pantalla de servicio, para que suba el número de robux del servidor. En este caso, utilicé la misma forma de obtener robux, pero en su propio bloque en funcionamiento. Esto es, me he utilizado un golpe de gracia, y con la pila RAM modificada que tengo eso acabó de joder el servidor de robux. No ha resultado, pero es parte del hack. Mi objetivo es ayudar a otros juegos, como ilusoriamente parecían las responsabilidades. Porque yo pasaba unos días que no venia un update y los juegos estaban inactivos y no podían jugar, y les robé el dinero con este hack de modificar y obtener más robux que el servicio permitía jugar, en ese momento, no lo tengo mucho más claro pero intentaré sacar lo que sepa. El mod dejará de funcionar el día que se cierre este post, así que lo que me toca es salvártelo para que no se vea que los juegos de robux ni robux no ofrecían el botón invertido
