I'm new to Java and i've been trying to solve this problem with while loops and other things. I have no idea how to make it do what it needs to do. The program reads a series of lines of input consisting of four space-delimited numbers. The numbers are printed out as four space- delimited numbers with leading zeroes if the numbers are less than 5. If the numbers are less than 25, the program should print a single number consisting of the four numbers. This is what I've come up with: Scanner input = new Scanner(System.in); System.out.println("Enter the digits:"); int x = input.nextInt(); int y = x - 1; int z = x - 2; int x = x - 3; int x = input.nextInt(); while(y >= 0 && x
