Scenario all aspects of using 3ds Max such as modeling, animation, materials, . Max Mesh Size The size of the largest meshes after adaptive splitting. Face sizing uses 3ds Max's model sizing method, but this method is slightly different from Photoshop's. This method is used, for example, to determine the size of faces in scenes such as game scenes, when the faces are geometric primitives such as a cube or sphere. This is also used to size faces in scenes where the model is another type of geometry, such as polygons.
