You have a new pfff area to install from, a new pfff area license key, and a.Q: C# : Inline assembly (CLR) vs DLL Possible Duplicate: why to use both DLL and its import section I want to know the differences in use of :- DLL vs CLR (Inline assembly) Please include some example statements which can show this difference. A: DLL is the traditional way of distribution of assemblies. A DLL is a compiled file containing all types from a given assembly. This includes assembly metadata (manifest and IL). While an Inline Assembly can be loaded only by specifying the load context. So, with inline assembly you can load the types without having any assembly metadata (i.e. it is an assembly without metadata like assembly metadata in .NET Framework are not required). /\* \* Licensed to the Apache Software Foundation (ASF) under one \* or more contributor license agreements.
