
Windows 10 Digital License Activation Script 7.0 !{Latest} 64 Bit !!LINK!!

change to 0 to return Windows 10/11 KMS38 to normal KMS ... The KMS_VL_ALL script(s) will close and then restart using the 64-bit (x64 / ARM64) cmd.exe. All the other scripts that try to do this but don't work are in this branch. I tried uninstalling and reinstalling Windows 10, but even reinstalling didn't work. I tried uninstalling and reinstalling Windows 10 and KB3862386. After uninstalling KMS38, I tried using Computer Management to move to Windows 10 and KB3862386. It didn't work. I tried installing "Advanced Tools" and "Advanced PC Management Tools" and found that they were out of date.
