Apple fans enjoyed a video clip of a new version of the iPhone SE a few days ago. However, the company failed to inform the public of the iPhone SE2 (iPhone SE 2) in the expected time, despite the availability of the model for purchase. The iPhone SE2 is a smaller version of the iPhone SE. It seems like there will be new, improved features of the smartphone in the iPhone SE2. Based on previous reports, the iPhone SE2 will be powered by the A13 processor. It is also rumored to have 6GB of RAM, a 12MP rear camera and an improved Face ID scanner. Will it be launched on March 31st? At the moment, the release date is not set. However, we hope it will be launched in the coming weeks or months.Q: javascript selenium webdriver how to check if element exists? I'm a little confused about using the Exist() method in javascript. I have this code : if (driver.FindElement(By.Id("btn-add-more-items")).Exists()) { driver.FindElement(By.Id("btn-add-more-items")).Click(); } Now this way : var elements = driver.FindElements(By.ClassName("btn-add-more-items")); if (elements.Count > 0) { driver.FindElement(By.Id("btn-add-more-items")).Click(); } will check if the button exists before clicking it or not? A: No, it won't. If you want to know whether a specific element exists, use the Exists method. If you want to know whether there are multiple elements, use the Count method.
