Can you please help me on this how to proceed? Thanks in advance. A: You can't do it, Apex Code gets compiled when it is first generated. See for example the docs for the process of initializing a new apex class. For information about the Initialization process for your new class, see Generate Apex Code in Class Initialization You will need to do this: Change the apex code. Re-compile it. Sidenote: You could take advantage of your organization's code reviews process to get feedback on the code. If you are creating it for the first time, a Salesforce dev could help you in that too. Q: Minkowski spacetime volume I have come across a book that defines the (Minkowski) volume of a sub-manifold A of the spacetime manifold M, with the following definition:
$$\mathrm{vol}_M(A)=\inf_{\tilde{A}}\int_M1\,\,\ma

thrm{d}^nx$$ The set $\tilde{A}$ ranges over all open sets contained in M whose closure contains A. If the volume is finite, the definition is meaningful. Otherwise, it would not be meaningful, since, for instance, a co-dimension-1 hyperplane has infinite volume. The author states, without proof, that $\mathrm{vol}_M(M)=\infty$. Question: Is the definition of the volume correct? If yes, why is $\mathrm{vol}_M(M)=\infty$? If no, why not? Thanks. A: The Minkowski volume is defined in terms of the "infimum over closed sets" of the integral of a function

Support for Markup Assist includes updates to the Graphic Styles Palette, Reference Palette, and Text Styles. Markup Assist is available as part of the Default Ribbon. (video: 1:15 min.) Run without opening AutoCAD: Turn off the Autolaunch Bar and AutoCAD opens without your intervention. (video: 1:13 min.) Web Services: Integrate your cloud-based applications with AutoCAD drawings and objects. Share and collaborate on your designs across

multiple platforms and devices with Web Services. (video: 1:15 min.) Add Web Services to the Ribbon. Now you can add Web Services to the ribbon directly from the Web Services toolbar. (video: 1:15 min.) New web services are available for Linked Prints, People, and Web Services. The People and Web Services web services offer direct and intuitive access to information stored in the cloud. The new Print Web Service gives you access to online printers and enables you to set up automatic or manual print jobs for all your drawings, as well as files and folders. You can now view and order printed material directly from AutoCAD. (video: 1:15 min.) Web Services are now available for Autodesk Sketcher, Autodesk SketchBook, Autodesk Plan Plus, and Autodesk Design 360. Web Services is a collection of web-based services, also referred to as web applications, that provide users with the ability to integrate their own applications with AutoCAD. With Web Services, users can create a new web application or configure an existing one to integrate into AutoCAD. (video: 1:13 min.) Improved user experience for Web Services. You can launch a Web Service directly from the ribbon and can even launch an existing Web Service directly from a file. The main features of Web Services are included in a new ribbon tab. (video:

1:14 min.) Planned features for the future: Printing: You can add AutoCAD's traditional print services to a web-based application and add them directly to a drawing. A new Printing Wizard helps you select the type of print service and get the best quality from your print job. (video: 1:15 min.) Linked Prints: Linked Prints are a new type of print service that's available from most web-based applications
