What's New in the?

Improved multi-layer graphical editing. See each layer of a document separately to see changes that will be applied to each layer and which layers can be edited separately. (video: 0:56 min.) You can save and load changes in a new "Markup Mode", which means that drawings that you save or "markup" will be saved with your own changes. You will be able to compare your saved files to the original state to see which changes you made. 3D Feature Sets: Create 3D models using either an on-screen or in-place toolset. You can import and edit 2D and 3D drawings, as well as measure and import your own 2D files, and create a 3D model based on those imported elements. With the In-Place 3D Modeling tool, a 3D surface can be created directly within the 2D drawing environment. (video: 0:58 min.) On-screen help: You can easily access the AutoCAD Help Center by clicking Help on the Windows taskbar or pressing F1. Access help quickly by using the Quick Search feature, or by using the Search Box in the help window. This new help system is a major overhaul of the previous help system, so even if you are familiar with it, you should review the new features. Partner Utilities: Make your drawings look as professional as possible with standard software to help you generate more accurate drawings, including the following: The Graticules widget is a new design feature in AutoCAD that lets you measure a 2D drawing. You can use it in combination with a drawing template to create professional drawings quickly. For example, you can use the widget to make a drawing grid for large-scale drawings. (video: 0:48 min.) The Organizer window in the Organizer tab shows you which folders and file types contain which applications. You can use Organizer to locate and organize your AutoCAD applications, making it easier to find the correct software. You can right-click a file or folder to open a context menu. (video: 0:47 min.) Shared drawing options in the Organizer window. Create shared drawings that work in multiple locations, such as drawing

templates, comments, and drawing groups. (video: 0:58 min.) The new Labels command helps you find drawing elements
