Download Free Cabela's Big Game Hunter 2012 Pc

cabela's big game hunter 2012 is an interesting game in that it is set in a more modern setting than its predecessors. the game features an opening cinematic that shows the game's newest hunter, dylan, to be the son of a past hunter, harvey. however, harvey died in an accident hunting an albino deer. in order to honor his father's memory, dylan begins hunting to find the albino deer. it is up to the player to guide dylan through the game's eight missions and hunt the deer. the game features five different wildlife to hunt, including an albino deer, wild boar, elk, bear, and caribou. during the game, players will have to take part in a series of timed events such as gun shooting or bow hunting. the game features five different locations to explore, including a mountaintop, forest, bayou, alpine, and the great western plains. the game also features eight different hunters to choose from that all offer different skill sets and special abilities. moreover, this game is much more simplistic than previous titles in the series. players will have to manually set an initial position and then go through the entire game with very little direction. you must use your own instincts and sharp eyes to sneak up on your prey. hidden game mechanics like animal radar and double-tap shooting help bring the realism but make for an extremely repetitive experience. also, the game's realistic graphics are not up to the standard of today's consoles. they're technically good, but the game runs at a glacial pace. also, the sound effects and music are simply terrible. they're atrociously low quality and lack any semblance of realism. the worst part of it all is that you can't even hear the guns go off. the only way to know you've taken a shot is when you see the animal fall. no shots are fired unless you opt for a hard kill. the player must wait for the animal to die before he can retrieve the carcass. if you feel you've got a shot, you can always shoot at the animal and try to kill it. however, the game isn't going to give you any indication whether the shot was successful. the game does not give you any direct feedback on your success or failure. this kind of game design choice is a slap in the face to true hunters who do not want to be reliant on an artificial system to succeed. 5ec8ef588b
