Portrait Professional will help you both in creating portrait photos and in artistically coloring portraits. With this program you can easily turn any black and white photo into a real work of art. Portrait Professional will help to achieve the most realistic results. The program includes tools for detailed editing any part of the image: sharpening the picture, eliminating the "red-eye" effect, automatic alignment of the image, adding sharpness to depicted objects, retouching, changing perspective, changing color palette, resizing the image and dividing the image into sections that can be controlled with sliders. The program is ideal for photographers who are trying to create as well as edit images with filters. Portrait Pro produces images with high quality and high speed. The program provides the user with a wide range of tools for detailed processing of portrait images. With this program you can separate the object from the background, add light and shadow effects, retouch minor imperfections, align colors, saturation and contrast. In addition, the program has an extensive set of tools for changing the color balance of the image, cropping, applying labels and outlines. Image processing can be done in batch mode. In addition to the listed image processing tools, it is possible to add effects in the form of frames, shadows, contours with the ability to adjust the intensity. The program includes more than 300 different masks. Various image formats (BMP, GIF, JPEG, TIFF, PNG) are supported. dd2bc28256
