PDF request | Revised AWWA C651-14 Water Supply Disinfection Standard | The American Water Works Association (AWWA) has released an updated AOSI (AWWA) standard. This document has been issued as part of a standardization effort to improve the quality and effectiveness of water pipe disinfection in the United States. This document, titled "Plumbing Disinfection Procedures," defines disinfection procedures and includes everything you need to know about how to do it the right way. It also includes guidance for OEMs, contractors, and others involved in the disinfection process.

Bahman 12, 1393 AP - This standard describes the basic procedures for disinfecting new and repaired drinking water pipes. . This standard reduces the risk of the spread of waterborne diseases by removing germs, viruses and bacteria from new drinking water pipes. The standard also reduces the amount of time required to disinfect new and repaired water pipes, which was previously up to 30 days. Bahman 12 describes the procedures for preparing new or repaired drinking water pipes throughout the disinfection process in accordance with Bahman Standard 12 dd2bc28256
