Even easier way to interface A wireless keyboard is another method of controlling your Samsung TV. To control your TV's home theater, picture, and other functions, all you need to do is just press the buttons on the wireless keyboard, and you can do that from just about anywhere. Samsung's EasyShare interface provides the simplicity you desire to control your TV from a distance. A few simple steps and you can get your home entertainment system up and running in no time.

ConnectShare JPEG You can control your Samsung TV, and watch a movie that you share on a USB device. The built-in ConnectShare JPEG technology can be connected to your Samsung's home theater system by USB and let you view pictures and sound files on your TV. You can watch a photo album or view the pictures you have taken using the built-in cam. Just plug your USB device into your TV using its USB port, and then use the TV's built-in remote controller to enjoy your entertainment. Ready when you are You don't have to miss a single moment. You can watch your movies when the Samsung TV is off, or you can listen to your favorite soundtracks. Thanks to an

HDMI connection, you can simply select your favorite HDMI format, and the Samsung TV will immediately connect to your surround system. No more searching for the remote. Use your Samsung TV, and live out your fantasy! Maximum Response The Samsung LN32D450 comes with a 1GHz Dual Core processor, an HDMI port for video input, two USB ports for external devices, an optical digital AV port, and wireless connectivity. The TV has a class-leading response rate of 0.1 milliseconds, which virtually eliminates the motion blur or blurring that is commonly seen in other TV technologies.

This response rate ensures that you will experience a crisp and clear picture even when watching fast-paced programming such as sports or movies.

if you want an affordable 32" set-up, we'd recommend the samsung le32r41bd. the picture quality isn't great, but it's good enough for a very cheap set-up. however, the image retention issues are a little concerning, especially when used with the xbox. backing off the back, we find a circular power button. this is the only backlit button on the unit, so in the dark it is hard to see, but it is easy to press. once the television is turned on, the power button allows the user to select the mode they wish to use. i've always found this the most useful feature on all of the samsung tvs i have owned. you can use the samsung smart tv to control the tv from the remote, or you can leave the remote on the table, step away from the tv and use the touch screen to select what you want to watch. you can also use the remote to change the channel or volume. these buttons are the same as all other samsung models, with the exception of the power button. this is the only backlit button on the unit. the power button allows the user to select the mode the television is using. i've always found this the most useful feature on all of the samsung tvs i have owned. you can use the samsung smart tv to control the tv from the remote, or you can leave the remote on the table, step away from the tv and use the touch screen to select what you want to watch. you can also use the remote to change the channel or volume. 5ec8ef588b
