
Sb Live Kx Project Audio Driver |VERIFIED|

precompiled driver builds (official). Contribute to the development of the `kxproject/kX-Audio-driver` binaries by creating a GitHub account. As mentioned during the driver installation process, when working with NVIDIA drivers from the `kxproject/nvidia` package, you must use the Compatibility Mode boot mode. To do this, open the console in KMS (keymanager), enter the `set-kms` command and enter the name of the account that you want to unblock (in this case it will be `my_email`). By default, unlocking accounts in KMS occurs at the end of the activation session, but if you don't care, you can speed up the process.
